Survey Cycle 2025

Overall Satisfaction: 65.30%

Service Performance

1. Financial Administration

Overall Satisfaction
83.00%

Need for Action
59.00%

Service Funnel Analysis:

Awareness **98.0%**
147 out of 150 residents know about the service.

Availment **68.0%**
100 out of 147 aware residents actually used the service.

Satisfaction **83.0%**
83 out of 100 users were satisfied with the service.

Skipped **2.0%**
3 out of 150 residents have no awareness of the service.

AI Analysis: Bottleneck Identified

The main bottleneck is in availment. While 147 residents are aware, only 100 actually used the service (47 aware residents did not avail). Improve service accessibility and reduce barriers to usage.

Note: AI analysis is experimental and may occasionally produce incorrect or misleading insights. Always cross-reference with the raw data.

Conditional Insights:

Top Unawareness Reasons

Why residents don't know about this service

1. Not informed by barangay (34 mentions)
2. Not interested (32 mentions)
3. Other reason (25 mentions)

Top Non-Availment Reasons

Why aware residents don't use this service

1. Too far or inconvenient (28 mentions)
2. Not eligible (25 mentions)
3. Did not need it (22 mentions)

Top 3 Citizen Concerns:

- 1 Limited information about available programs

2 Need better communication of budget allocations

3 Improve accessibility of financial reports

Public Perception:

AWARENESS STAGE

"Information about services should be more accessible."

AVAILMENT STAGE

"Too many requirements for simple transactions."

SATISFACTION STAGE

"Overall satisfied but more support needed."

Recommendations:

Short-term (0-3 months):

- Set up mobile service points in different sitios
- Reduce documentary requirements for applications

Medium-term (3-12 months):

- Hire additional staff or volunteers
- Develop comprehensive training programs

Long-term (1+ years):

- Establish innovation and modernization programs
- Create long-term capacity building initiatives

Action Grid Classification: **Continued Emphasis**

2. Disaster Preparedness

Overall Satisfaction
64.90%

Need for Action
50.00%

Service Funnel Analysis:

Awareness **87.3%**
131 out of 150 residents know about the service.

Availment **58.8%**
77 out of 131 aware residents actually used the service.

Satisfaction **64.9%**
50 out of 77 users were satisfied with the service.

Skipped **12.7%**
19 out of 150 residents have no awareness of the service.

AI Analysis: Bottleneck Identified

The main bottleneck is in availment. While 131 residents are aware, only 77 actually used the service (54 aware residents did not avail). Improve service accessibility and reduce barriers to usage.

Note: AI analysis is experimental and may occasionally produce incorrect or misleading insights. Always cross-reference with the raw data.

Conditional Insights:

Top Unawareness Reasons

Why residents don't know about this service

1. No access to information (31 mentions)
2. Other reason (28 mentions)
3. Not informed by barangay (24 mentions)

Top Non-Availment Reasons

Why aware residents don't use this service

1. Too far or inconvenient (33 mentions)
2. Not eligible (29 mentions)
3. Other reason (22 mentions)

Top 3 Citizen Concerns:

- 1 Need early warning systems

2 Insufficient evacuation centers

3 Lack of emergency supplies

Public Perception:

AWARENESS STAGE

"Information about emergency services is lacking."

AVAILMENT STAGE

"Emergency supplies are insufficient."

SATISFACTION STAGE

"Preparedness is okay but needs more resources."

Recommendations:

Short-term (0-3 months):

- Simplify application and registration processes
- Extend service hours to accommodate more residents

Medium-term (3-12 months):

- Allocate additional budget for service improvements
- Upgrade facilities and equipment

Long-term (1+ years):

- Develop comprehensive service improvement plan
- Build sustainable funding mechanisms for service continuity

Action Grid Classification: **Exceeded Expectations**

3. Safety & Peace Order

Overall Satisfaction
72.70%

Need for Action
63.00%

Service Funnel Analysis:

Awareness **94.0%**
141 out of 150 residents know about the service.

Availment **78.0%**
110 out of 141 aware residents actually used the service.

Satisfaction **72.7%**
80 out of 110 users were satisfied with the service.

Skipped **6.0%**
9 out of 150 residents have no awareness of the service.

AI Analysis: Bottleneck Identified

The main bottleneck is in satisfaction. While 110 residents used the service, a significant portion (30 out of 110) were not satisfied. Enhance service quality and address user concerns.

Note: AI analysis is experimental and may occasionally produce incorrect or misleading insights. Always cross-reference with the raw data.

Conditional Insights:

Top Unawareness Reasons

Why residents don't know about this service

1. No access to information (43 mentions)
2. Not interested (40 mentions)
3. Other reason (38 mentions)

Top Non-Availment Reasons

Why aware residents don't use this service

1. Too far or inconvenient (44 mentions)
2. Not eligible (33 mentions)
3. Did not need it (31 mentions)

Top 3 Citizen Concerns:

1 Install CCTV cameras

2 Improve response time to incidents

3 Strengthen community watch programs

Public Perception:

AWARENESS STAGE

"Awareness of safety initiatives is high."

AVAILMENT STAGE

"Safety services are generally available."

SATISFACTION STAGE

"Security measures are adequate but need enhancement."

Recommendations:

Short-term (0-3 months):

- Improve staff training and customer service
- Upgrade facilities and equipment

Medium-term (3-12 months):

- Hire additional staff or volunteers
- Develop comprehensive training programs

Long-term (1+ years):

- Establish innovation and modernization programs
- Create long-term capacity building initiatives

Action Grid Classification: **Continued Emphasis**

4. Social Protection

Overall Satisfaction
73.30%

Need for Action
55.00%

Service Funnel Analysis:

Awareness **94.7%**
142 out of 150 residents know about the service.

Availment **73.9%**
105 out of 142 aware residents actually used the service.

Satisfaction **73.3%**
77 out of 105 users were satisfied with the service.

Skipped **5.3%**
8 out of 150 residents have no awareness of the service.

AI Analysis: Bottleneck Identified

The main bottleneck is in satisfaction. While 105 residents used the service, a significant portion (28 out of 105) were not satisfied. Enhance service quality and address user concerns.

Note: AI analysis is experimental and may occasionally produce incorrect or misleading insights. Always cross-reference with the raw data.

Conditional Insights:

Top Unawareness Reasons

Why residents don't know about this service

1. Not interested (48 mentions)
2. No access to information (44 mentions)
3. Other reason (41 mentions)

Top Non-Availment Reasons

Why aware residents don't use this service

1. Did not need it (36 mentions)
2. Other reason (34 mentions)
3. Not eligible (31 mentions)

Top 3 Citizen Concerns:

1 Senior citizen assistance

2 Expand social welfare programs

3 Improve access to health facilities

Public Perception:

AWARENESS STAGE

"Social program awareness is generally good."

AVAILMENT STAGE

"Service delivery could be more efficient."

SATISFACTION STAGE

"Quality is good but accessibility needs improvement."

Recommendations:

Short-term (0-3 months):

- Improve staff training and customer service
- Upgrade facilities and equipment

Medium-term (3-12 months):

- Upgrade facilities and equipment
- Hire additional staff or volunteers

Long-term (1+ years):

- Build sustainable funding mechanisms for service continuity
- Establish innovation and modernization programs

Action Grid Classification: **Exceeded Expectations**

5. Business Friendliness

Overall Satisfaction
65.20%

Need for Action
51.00%

Service Funnel Analysis:

Awareness **89.3%**
134 out of 150 residents know about the service.

Availment **34.3%**
46 out of 134 aware residents actually used the service.

Satisfaction **65.2%**
30 out of 46 users were satisfied with the service.

Skipped **10.7%**
16 out of 150 residents have no awareness of the service.

AI Analysis: Bottleneck Identified

The main bottleneck is in availment. While 134 residents are aware, only 46 actually used the service (88 aware residents did not avail). Improve service accessibility and reduce barriers to usage.

Note: AI analysis is experimental and may occasionally produce incorrect or misleading insights. Always cross-reference with the raw data.

Conditional Insights:

Top Unawareness Reasons

Why residents don't know about this service

1. Not interested (16 mentions)
2. No access to information (15 mentions)
3. Other reason (12 mentions)

Top Non-Availment Reasons

Why aware residents don't use this service

1. Other reason (13 mentions)
2. Did not need it (12 mentions)
3. Too far or inconvenient (5 mentions)

Top 3 Citizen Concerns:

- 1 Provide business development assistance

2 Complicated permit processes

3 High fees and requirements

Public Perception:

AWARENESS STAGE

"Better information dissemination for entrepreneurs needed."

AVAILMENT STAGE

"Business clearance takes too long to process."

SATISFACTION STAGE

"More assistance needed for entrepreneurs."

Recommendations:

Short-term (0-3 months):

- Implement online application systems
- Simplify application and registration processes

Medium-term (3-12 months):

- Upgrade facilities and equipment
- Hire additional staff or volunteers

Long-term (1+ years):

- Develop comprehensive service improvement plan
- Build sustainable funding mechanisms for service continuity

Action Grid Classification: **Exceeded Expectations**

6. Environmental Management

Overall Satisfaction
75.90%

Need for Action
48.00%

Service Funnel Analysis:

Awareness **85.3%**
128 out of 150 residents know about the service.

Availment **61.7%**
79 out of 128 aware residents actually used the service.

Satisfaction **75.9%**
60 out of 79 users were satisfied with the service.

Skipped **14.7%**
22 out of 150 residents have no awareness of the service.

AI Analysis: Bottleneck Identified

The main bottleneck is in availment. While 128 residents are aware, only 79 actually used the service (49 aware residents did not avail). Improve service accessibility and reduce barriers to usage.

Note: AI analysis is experimental and may occasionally produce incorrect or misleading insights. Always cross-reference with the raw data.

Conditional Insights:

Top Unawareness Reasons

Why residents don't know about this service

1. Not interested (20 mentions)
2. Other reason (19 mentions)
3. Not informed by barangay (13 mentions)

Top Non-Availment Reasons

Why aware residents don't use this service

1. Did not need it (12 mentions)
2. Too far or inconvenient (12 mentions)
3. Other reason (12 mentions)

Top 3 Citizen Concerns:

- 1 Need more recycling programs

2 Water quality issues

3 Improve waste segregation compliance

Public Perception:

AWARENESS STAGE

"Environmental awareness campaigns should continue."

AVAILMENT STAGE

"Waste management services need improvement."

SATISFACTION STAGE

"Services are available but quality varies."

Recommendations:

Short-term (0-3 months):

- Extend service hours to accommodate more residents
- Set up mobile service points in different sitios

Medium-term (3-12 months):

- Create service quality standards and benchmarks
- Develop partnerships with NGOs and other agencies

Long-term (1+ years):

- Build sustainable funding mechanisms for service continuity
- Establish innovation and modernization programs
